

California's Most Promising Geological Formation for Spent Fuel "The California Option"

A Private Away-From-Reactor Initiative
by: Rudy Salazar

- Unpopulated 58 acres in Randsburg California
- Over a 100 miles away from major populations
- No water table
- No water basin
- Quartz-Monzonite Geologic Formation
- Far east of the San Andreas Fault
- Completely surrounded by BLM property
- 100's of full time job creation opportunity
- Develop modern Spent Fuel career skills
- 120 miles away from possible future permanent federal storage
